**Magma storage region processes of the Soufrière Hills Volcano, Montserrat**

JOSEPH D. DEVINE & MALCOLM J. RUTHERFORD\*

\*Corresponding author (e-mail: [Malcolm\\_Rutherford@brown.edu](mailto:Malcolm_Rutherford@brown.edu))

An appendix was added to the above article after the review process. This is contrary to the Society's requirements that all published material is peer-reviewed. The appendix discusses the work of other research groups in a way that the Society considers to be inappropriate.

The research groups whose work is discussed contest the statements in the appendix and will submit a discussion to *Journal of the Geological Society*. Once the discussion is accepted and published in the journal, a reference to it will appear under the abstract of the online Memoir chapter.

In addition, the reference to Devine (2006) implies that it is a report. In fact it is an e-mail from Professor Devine to Dr Loughlin, then acting Director of MVO, part of which is quoted in the appendix, and should therefore not be considered part of the scientific literature.
