

## Contents

<b>Preface</b>	<b>vii</b>		
<b>Acknowledgements</b>	<b>viii</b>		
<b>Chapter 1 Overview and biostratigraphy</b>	<b>1</b>		
Opening remarks and objectives	1		
The Cambrian geology of Pembrokeshire	3		
Physiography, nature of exposure and access	3		
History of research	3		
Structure	3		
Regional geological context	7		
Definition of the Cambrian and its subdivisions	9		
Cambrian biostratigraphy in SW Wales	11		
Terreneuvian Series	11		
Unnamed Cambrian Series 2	12		
Unnamed Cambrian Series 3	12		
CS5: <i>oelandicus</i> Biosuperzone	12		
CS5: <i>gibbus</i> Biozone	12		
Drumian: <i>fissus</i> Biozone	13		
Drumian: <i>parvifrons</i> Biozone	13		
Drumian: <i>punctuosus</i> Biozone	13		
Guzhangian Stage: <i>pisiformis</i> Biozone	13		
Furongian Series	13		
List of fossiliferous localities and faunal summaries	13		
Trwyncynddeiriog	15		
Point St John–Porth Cadnaw, Ramsay Sound	15		
Dwrhyd	15		
Penpleidiau headland, Caerfai Bay	20		
Ogof Eynon	26		
Solva Harbour	26		
Porth-y-rhaw	26		
References	28		
<b>Chapter 2 Lithostratigraphy and palaeoenvironments of the Cambrian in SW Wales</b>	<b>33</b>		
Caerfai Group (revised)	33		
Ogof Golchfa Formation (new)	35		
Lithofacies Association A	37		
Lithofacies A1: unstratified, tabular, clast-supported conglomerate	37		
Lithofacies A2: muddy matrix-supported conglomerate	37		
Lithofacies A3: unstratified, lenticular sand-matrix-supported conglomerate and pebbly sandstone	37		
Lithofacies A4: purple and red silty mudstone	39		
Lithofacies Association B	40		
Lithofacies B1: graded pebble conglomerate	40		
Lithofacies B2: stratified pebble conglomerate and pebbly sandstone	42		
Lithofacies B3: stratified lenticular sandstone and massive silty mudstone	42		
Lithofacies Association C	42		
Lithofacies C1: well-segregated pebble conglomerate and coarse sandstone	42		
Lithofacies C2: trough cross-stratified coarse-grained sandstone	44		
Lithofacies C3: hummocky cross stratified sandstone	45		
Facies analysis and palaeoenvironments	46		
Lithofacies Association A: alluvial fan sedimentation	46		
Lithofacies Association B: braided stream sedimentation	48		
Lithofacies Association C: transgressive marine sedimentation	48		
St Non's Formation	49		
Caerfai Bay Formation	51		
Caer Bwdy Bay Formation	53		
Newgale Formation (new)	55		
Lithofacies Association NA	55		
Lithofacies NA1: unstratified, tabular, non-erosive pebbly sandstone	55		
Lithofacies NA2: unstratified, lenticular pebbly sandstone	55		
Lithofacies Association NB	58		
Lithofacies NB1: wavy and flaser bedded silty mudstone	58		
Lithofacies NB2: unstratified lenticular sandstone	58		
Lithofacies NB3: unstratified tabular sandstone	62		
Lithofacies NB4: muddy diamictite	62		
Lithofacies NB5: massive to normally graded, crudely stratified pebbly sandstone	63		
Lithofacies NB6: microlaminated, weakly bioturbated mudstone and siltstone	64		
Trwyncynddeiriog Member (new)	65		
Pen-y-Cyfrwy Member (new)	66		
Cwm Mawr Member (new)	66		
Porth Clais Formation (new)	66		
Lithofacies PC1: massive to normally graded, crudely stratified pebbly sandstone	68		
Lithofacies PC2: inverse to normal and inversely graded unstratified sandstone	68		
Lithofacies PC3: graded sandstone with hummocky cross stratification and climbing ripple lamination	69		
Lithofacies PC4: graded, stratified tabular sandstone	70		
Lithofacies PC5: weakly graded, bioturbated silty mudstone	71		
Facies analysis and palaeoenvironments	71		
Porth-y-rhaw Group (new)	72		
Whitesands Bay Formation (new)	72		
Menevia Formation (new)	73		
Lithofacies M1: stratified fine sandstone and siltstone	75		
Lithofacies M2: homogeneous silty mudstone with discontinuous limestone	75		
Lithofacies M3: graded and banded siltstone and black mudstone	75		
Lithofacies M4: laminated black mudstone	77		
Aber Llong Formation (new)	78		
Ogof Velvet Formation (revised)	80		
Lithofacies Association OVA	80		
Lithofacies OVA1: rippled siltstone and sandstone with interbedded mudstone	80		
Lithofacies OVA2: siltstone-filled gutter casts	82		
Lithofacies OVA3: amalgamated lenticular sandstone	84		

Lithofacies Association OVB	85	Sequence 4	106
Lithofacies OVB1: sheet-like amalgamated sandstone	85	Sequence 5	109
Lithofacies OVB2: thinly-bedded sandstone and shale	85	Sequence 6	109
Lithofacies OVB3: sandstone and mudstone with soft-sediment deformation	86	Sequence 7	112
		Sequence 8	113
Lithofacies Association OVC	87	Tectonostratigraphy, provenance and basin analysis	116
Lithofacies OVC1: tabular graded fine–very fine sandstone	87	Megasequence 1 (sequences 1–7)	118
Lithofacies OVC2: structureless silty mudstone	87	General remarks	118
Facies analysis and palaeoenvironments	88	The lower part of the Caerfai Group: tectonosedimentary model and basin margin evolution	120
Treffgarne Bridge Formation	90		
References	91	The extensional regime	124
		Implications for the late Neoproterozoic–Cambrian tectonostratigraphic evolution of East Avalonia	124
<b>Chapter 3 Sequence stratigraphy, tectonostratigraphy and basin analysis</b>	<b>101</b>	Megasequence 2 (Sequence 8)	125
Geological and stratigraphical setting	101	References	128
Sequence stratigraphy	102		
Depositional sequences	106		
Sequence 3	106	<b>Index</b>	<b>135</b>
